Ayer MS 694 map
1 ms. map : hand col. ; 502 x 521 mm.
Nineteenth century tracing derived from Guillaume de L'Isle's Carte de la Louisiane et du Mississippi (Paris, 1718). Covers region roughly bounded by the Rio Grande, the Missouri River, Lake Huron, eastern Florida, and the mouth of the Rio Grande, but most detailed in the Mississippi River valley and the Gulf Coast. Unlike L'Isle's map, the tracing shows routes traveled by Louis Juchereau de St. Denis during both his expeditions to Texas between 1714-1719. See Jackson, Jack. Manuscript maps concerning the Gulf Coast (Chicago: Hermon Dunlap Smith Center for the History of Cartography, 1995) p. 30, no. 140. Detached from a 19th century transcription of André Pénicaud's manuscript Relation ou annale de ce qui s'est passé dans le pays de la Louisiane pendant vingt-deux années consecutives ... 1699-1721. Made by or for Gabriel Gravier from original manuscript in the Bibliothèque municipale de Rouen. A variant manuscript of Pénicaud's Relation is held by the Bibliothèque nationale (France), Français 14613. See Stacia Fischer's English translation, bibliography, and notes in the Special Collections Information File.
Scale [ca. 1:6,110,000]. 'Echelle de cent lieües françoises' [= 91 mm.].
Pen-and-ink and watercolor (blue, red); separated along previous folds and mounted on heavy paper backed by cloth. Pénicaud's memoires were published in Fleur de lys et calumet: being the Pénicaud narrative of French adventure in Louisiana / translated and edited by Riebeubg Gaillard McWilliams (Tuscaloosa, Ala.: University of Alabama Press, [1988]).

Includes bibliographical references and index.
This book takes a view of New England’s landscapes that goes beyond picture postcard-ready vistas of white-steepled churches, open pastures, and tree-covered mountains. Its chapters describe, for example, the Native American presence in the Maine Woods; offer a history of agriculture told through stone walls, woodlands, and farm buildings; report on the fragile ecology of tourist-friendly Cape Cod beaches; and reveal the ethnic stereotypes informing Colonial Revivalism. Taken together, they offer a wide-ranging history of New England’s diverse landscapes, stretching across two centuries. The book shows that all New England landscapes are the products of human agency as well as nature. The authors trace the roles that work, recreation, historic preservation, conservation, and environmentalism have played in shaping the region, and they highlight the diversity of historical actors who have transformed both its meaning and its physical form. Drawing on a wide range of disciplines, including history, geography, environmental studies, literature, art history, and historic preservation, the book provides fresh perspectives on New England’s many landscapes: forests, mountains, farms, coasts, industrial areas, villages, towns, and cities. Illustrated, and with many archival photographs, it offers readers a solid historical foundation for understanding the great variety of places that make up New England.
